The price plan for variable calling patterns

With Optima Business, you can make sure that your coaches communicate with their clients and business partners in the most efficient and cost-effective manner. The automatic feature of this plan means you no longer have to spend time analysing calling patterns. This means that you can focus on what is really important - your business.

Optima Business adapts to your communication patterns each month

At the end of every month, Optima Business retroactively calculates the best call and SMS rates for each ICF coach. The employee's optimisation level is then automatically adapted to their actual calling patterns. This way, you are sure that you are always using the price plan that corresponds to your actual monthly usage.

As with all business price plans from Orange, you can enjoy all the benefits of a closed user group, which means free calls between group members, including to fixed line numbers. Employees also benefit from inclusive monthly talk time minutes plus a fixed rate for additional minutes. This rate applies to calls to all mobile and fixed line numbers in Switzerland as well as those in Europe, the USA, Japan and many more countries besides (zones 1, 2 and 3).

Automatic adaptation

Right from the first month, your newcomer price plan is automatically optimised to a higher and more favourable price plan if the employee's actual usage will result in a cheaper tariff. Optimisation to a lower level is possible after 6 months if a mobile phone was purchased at special conditions.

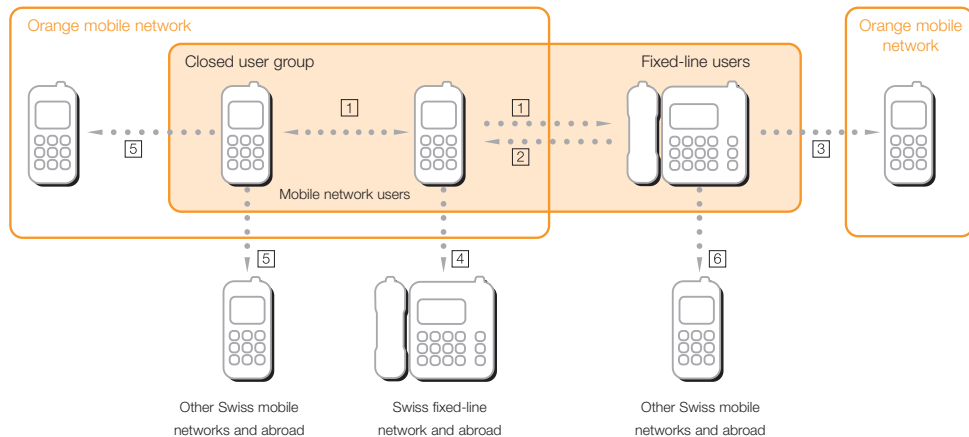

> The benefits at a glance

- All participating members within International Coach Federation ICF can call each other for free
- Automatic adaptation according to actual monthly usage
- Call Europe and the USA for the price of a local call within Switzerland
- One price for calls to all Swiss networks and abroad
- Free calls to mobile and fixed-line numbers within the closed user group
- Free calls to your Orange Box
- Inclusive monthly talktime minutes, including for calls abroad (zones 1, 2 and 3)
